https://archive.org/details/statisticalrepor00penn_7

This report presents the statistical information concerning the Bureau of Mental Health for the fiscal year ending May 31, 1945. A review of the tables and calculations indicates the problem faced by the mental institutions in the Commonwealth of Pennsylvania.

During this period all the factors destructive of civilian institutions resulting from war were experienced. Personnel turnover was abnormally high and experienced to a maximum degree in the professional fields.

The employees on the attendants level sought more remunerative positions and those who remained were given excessive responsibilities.

Throughout this entire period as a result of the fine spirit of the employees no institutional services were eliminated. Many examples of heroic services unpublished and unheralded occurred.

All beds were filled and in many cases the population was far beyond capacity. Every effort was exerted to keep the service on as high a plane as possible.

Without this background the important significance of this report is lost.

Department of Welfare

S.M.R. O'Hara

Secretary

This Eleventh Annual Statistical Report, Section A, is comparable to the previous reports covering the subject of Mental Health. The data used in preparing these tables is furnished by the 22 Institutions who care for the Mentally Ill, Mentally Deficient and Epileptic patients in the state.

Special reports and routine departmental reports are also prepared from the same source material.

In interpreting the information and facts listed in this report, it is important that the reader consider that these figures represent and reflect conditions existing during an unusual period.

Two additional Sections of the Eleventh Annual Statistical Report of the Department of Welfare are also issued; Section B, dealing with Penal Institutions and Section C, dealing with Fiscal, Institutional Management, and problems involving Community Activities.

The Division of Research and Statistics under the supervision of Mrs. Gertrude H. Thompson compiled and prepared this report.

* This hospital receives no direct commitments. Its objectives are these:

(1) Research - the intensive study and vigorous treatment of selected cases, drawn from the whole Commonweal

(2) Education - the training of medical students, post graduates, physicians on the staffs of the State institutions and other personnel such as nurses and social workers.

(3) Observation - and examination of selected cases, offering difficult and unusual problems such as have educational value and which require intensive research.

(4) An extensive out-patient department through which a considerable amount of local institutionalization may be avoided. This Clinic also acts as a model and is used for the purpose of improving out-patient Clinics in other parts of the state.

** No capacity or percentage of occupancy figures listed due to the type and nature of the institution. Populati figures are carried so that the totals will balance with other totals listed in this bulletin.

BUREAU OF MENTAL HEALTH

This issue, the Eleventh, in a continuous annual series, records selected data covering the fiscal year ending May 31, 1945.

Twenty-five Institutions consisting of all the State-owned and State-aided Mental facilities of the Commonwealth contribute to these statistics and comprise nineteen Hospitals for the Mentally Ill, Mental Defectives, and one Colony for Epileptics. State-owned and operated institutions number seventeen, three, and one respectively in the above category. Dixmont appears for the last time as a State-aided Mental Hospital, since it was subsequently acquired by the Commonwealth on October 15, 1945. The Ransom Mental Hospital a County Institution licensed by this Bureau, is in an anomalous position until decisive action can be taken regarding its mental patients.

The Western State Psychiatric Institute and Clinic is the new designation by legal statute for the Western State Psychiatric Hospital. This change for our Pittsburgh Institute is more in line with its special function as a research and educational component of the Commonwealth's Mental Health system. In its relation to the medical center at Pittsburgh, extensive teaching and training is carried on and is being further developed. With the War Department and other agencies, as well as in its own regular program, the Institute is carrying on research. Through the out-patient clinic, mental hygiene service is available to a wide local area. Expansion of service to the State Mental Health system to cover the educational fields of the medical, nursing, psychological and social service elements are anticipated after the war period.

The statistics herewith submitted are not of a normal period.

They do not indicate the extreme hardships encountered in trying to keep a mental institution functioning when individuals and groups were called upon to serve the total war effort. They do not show the almost complete subordination of all standards of civilian care and treatment to the primary needs of supporting military demands. In fact they do not represent the valiant fight carried on by the loyal institutional personnel except only in that a complete breakdown did not take place and in that statistics were still available.

Yet with stopgaps, temporary expediencies and great personal courage, the institutions under versatile leadership met the mounting inadequacies incurred by depleted personnel, the further overcrowding of patients, of deterioration of physical operation and the innumerable inevitable complications. For long periods situations had to be met from day to day when the margin of safety vanished. Casualties occurred among personnel and the treatment of patients showed a marked trend to custodial methods. Pressure for admissions became so general that the terms of "urgent" and "emergency" acquired a purely relative meaning. Some public criticism was observed and there developed so-called "critical"areas in the state. Strong efforts were made by all responsible authorities for mutual understanding and cooperation. These efforts brought recognition and will certainly bear further fruit. The results in the next few years will be credited to the understanding sympathy and active support of an enlightened public.

Therefore, it is felt that these statistics do not reflect the entire picture of the difficult period over which they were obtained. Accordingly, no attempt is made at this time to discuss them or to analyze certain features in comparison with former years.

Qualitatively, comparisons noted in our previous issue are essentially the same. Quantitatively, the figures are too much influenced by artificial conditions to establish definite trends.

# Department of Welfare

*S. M. R. O'HARA*
*Secretary*

1945

Bulletin No. 88 Penal Section B

-10

metals.

Over 165,000 shirts were made for the Navy and a smaller quantity for the Army. Other activities including the growing of trees at the nursery at one of the penitentiaries for camouflage purposes, the producing of metal tags, crates, and furniture for the Ordinance Department.

Intensive study and planning by the Department of Welfare for fulfillment of the Acts passed by the General Assembly of 1945 has been a major project of this year. This program embraces a total revision of the method of committing and assigning individuals committed to State institutions. The construction program has been inaugurated and progress made upon development of plans and specifications for the institutions included in the proposed correctional system. The key to this system will be a central diagnostic and classification service, supplemented by institutions classified as to the type of security, training and rehabilitative program.

Department of Welfare

| | County Prisons | 42 |
| | Rehabilitative Training | 66 |

This is the second section of the Eleventh Annual Statistical Report and deals primarily with commitments and population of county and State Penal Institutions. Section A, deals with problems of Mental Health and Section C, deals with the problems of child care, care of aged, and other activities supervised by the Bureau of Community Work and the Bureau of Institutional Management.

In order to give a clearer picture of the service rendered by the county prisons of the Commonwealth tables on admissions and discharges have been included for the first time in this Statistical Report. The table which appears on page 43 , lists the number and source of admissions. The other table which appears on page 46 , lists the number of discharges and methods by which discharges were made.

Included, also, will be found charts showing the expenditures in the county prisons. Tables giving activities of the different criminal courts of the State are a part of this bulletin. These tables give the disposition of defendante in criminal cases and also the type of sentence imposed. The activities of the Prison Industries showing the number of inmates employed appear in a separate table.

The tabulation of the data found in this report was performed by the members of the Division of Research and Statistics' staff. Mrs. Gertrude H. Thompson, Supervisor of this Division, directed the compilation and edited this bulletin.

E. Preston Sharp
Director

## BUREAU OF CORRECTIONS

The Bureau of Corrections represents the Department of Welfare and is responsible for the inspecting, supervising and regulating of all institutions in the penal group. This Bureau, through the cooperation of the Division of Research and Statistics, herewith submits information and statistics compiled from data received from the State and County Penal and Correctional Institutions.

The Bureau is governed by Laws and Acts of Legislature, the Administrative Code, and standards prescribed by the Secretary of Welfare covering the physical maintenance and administrative policies in the institutions. The primary duty of the Bureau is to inspect, supervise and regulate the prisons, and investigate all unusual occurrences in all institutions within the jurisdiction of the Department of Welfare to insure just, humane care and considerate treatment of all persons confined therein.

The Commonwealth has progressed far in its penal program and the original idea of punishment and solitary confinement for inmates has changed so vastly that now the inmates are accepted at the institution with the definite idea of rehabilitating them for eventual return to society.

It is the aim of each institution to employ capable and well-advised persons who would be able to cope with any and all situations and all types of offenders.

Ths Classification Board determines the type of confinement best suitsd to the individual; the training for which he is adapted; the educational and vocational training necessary to equip him for the future; the medical and surgical services he may require; and the psychological and psychiatric treatment necessary. Ths spiritual need for those incarcerated is administered by the Chaplains in a well organized program. Balanced diets, proper housing, exercise, hobbies, libraries, recreation, entertainment and suitable

work is afforded the offenders. Many have an opportunity to maintain some semblance of dependancy and self-sufficiency through employment in prison shops and farms. The inmate has the privilege of requesting private interviews and consultations with members of the Bureau of Corrections who gives him the advice and assistance in his problems as an unbiased third party. All these efforts toward individualization are employed to enable the offender to "do his time" in a manner that will assist him in rehabilitating himself and insure his safe return to society and reclaim him from further criminal tendancies.

In April, 1944, the Governor appointed a Commission composed of men who have had practical experience in dealing with criminals, to survey the existing penal and correctional institutions of this Commonwealth, to make recommendations for the reorganization of the penal institutions, to provide for Pennsylvania the highest standards and treatment of crime and delinquency. This Commission performed the task in an able manner, and the recommendations would, if incorporated, improve the penal and correctional program to such an extent that it would bring Pennsylvania once again to the position of leadership in the penal programs of the United States.

Because of the increase in crime and delinquency which will, no doubt, increase throughout the country during the post-war era, and due to the inability of many persons to properly adjust to normal conditions, it will be advisable to abandon some of the more antiquated prisons and erect more suitable buildings. Additional institutional facilities are necessary to adequately segregate offenders according to age, sex, criminal record and nature of crime. It is also necessary to have institutions with different degrees of custody so that the first offender will have a maximum opportunity of rehabilitation and will not be associated with the hardened criminal. Fine prison structures with high walls quarantee neither rehabilitation or custody.

A well defined program administered by competent and experienced personnel is more important. The size of Pennsylvania and the addition of new State Penal institutions will place a greater responsibility upon the Bureau of Corrections in maintaining an efficient program.

The charts and graphs appearing in this report present much information dealing with the crime, the offender, the institution and the criminal justice program. Space does not permit a detailed explanation of all the important material available, but a few major comparisone follow:

New commitments to the State Penal and Correctional Institutions for the period ended May 31, 1945 were 1764, representing a decrease of 61 over the previous year. The population in these institutions on May 31, 1945 was 6551, representing a reduction of 70 over the previous year. Discharges from these same institutions for the period ended May 31, 1945 were 2563, or increase of 139 over the previous year.

Burglary, Robbery, Larceny and Sex Offenses, (in the order named), were predominant in type of crimes committed.

Of the 1764 commitments 889 were under 21 years of age; 296 between the ages of 21 and 24 years; constituting 67% of the total commitments. The majority of this group were 15, 16, 18 to 21 years of age, and represented their first offense against society. This situation is understandable from many standpoints; 1) broken homes, 2) extreme lack of parental supervision, 3) lowering of moral standards, 4) sex, crime and delinquency depicted and portrayed in the moving pictures, 5) literature dealing with sex and crime flooding the markets, and 6) the numerous radio programs dealing with crime in its worst aspects. One source of elimination of this pervading evil among juveniles is for the parents of children to publicly demand that the moving picture industry, broadcasting stations and publishers bring the standards of their entertainment and literature to a higher level in an effort to combat

juvenile delinquency. It cannot be too strongly urged that strict censorship of these conditions be established.

All but 374 of the total commitments to the State Penal and Correctional Institutions during the period ended May 31, 1945 were of parents born in the United States.

Of the total commitments to the State Penal and Correctional Institutions for the period ended May 31, 1945, 1289 were single; this of course represents the juveniles who have not reached mature years.

Court commitments to County Prisons for the period ended May 31, 1945 were 3575, as against 3597 for the previous period. This figure shows a slight decrease. 2380 of the total number committed by courts during the year ended May 31, 1945 were first offenders.

Special attention is called to the tables indicating movement of population in County Prisons. This is the first year these figures have been compiled. The population in the County Prisons on June 1, 1944 was 4562. Admissions to County Prisons by authoritative source of commitment or sentence were 53,589; releases by authoritative method of discharge were 53,617.

Disposition of defendants of major offenses is interesting in view of the large number of inmates incarcerated in the institutions. 27.8 were granted probation and given suspended sentence which indicates that local judges are unwilling to give prison sentences in cases where the offender can be returned to society and overcome his tendency toward crime. 25% of the cases were settled by costs and fines, which step toward restitution often keeps the offender from becoming a recidivist in crime, and in the case of male offenders with families, he is able to maintain his family without the aid of charitable organizations.

The institutions inspected and supervised by the Bureau of Corrections are as follows: Eastern State Penitentiary, Philadelphia; New Eastern

State Penitentiary, Graterford; Western State Penitentiary, Pittsburgh; New Western State Penitentiary, Bellefonte; State Industrial Home for Women, Muncy, Pennsylvania Industrial School, Camp Hill; Pennsylvania Institution for Defective Delinquents, Huntingdon; Pennsylvania Training School, Morganza; Allegheny County Workhouse, Blawnox; House of Correction, Philadelphia; 68 County Prisons and 500 City, Borough and Township Lockups.

For the year ended May 31, 1945, the Bureau of Corrections instituted 410 transfers of inmates from one institution to another. The transfer of prisoners is occasioned for various reasons; first, there is the inmate who is unable to adjust, secondly, the health or mentality of an inmate may occasion a move, or he may require a lesser degree of custody for rehabilitation; and, lastly, the majority of transfers are required where inmates are employed in farm and food production.

The main object of this summation of material and comparison of charts and tables is to impress, in part, upon the reader that every effort toward individualized treatment of the inmate is in its productive stage, and that the results have proven the worth of advanced penological views in the care, treatment and custody of the persons confined in any of Pennsylvania's Penal Institutions.

We have endeavored to bring to your attention the most significant comparisons in the statistics herein presented; however, it has not been our intention to have covered all the material and many more interesting comparison can be made.

COMMONWEALTH OF PENNSYLVANIA

# ELEVENTH ANNUAL STATISTICAL REPORT

*of the*

# Department of Welfare

*S. M. R. O'HARA*
*Secretary*

1945

Bulletin No. 88 General Section C

-10

The Department of Welfare issues yearly a statistical report in three separate sections. Section A, deals with the problems of the mentally ill, Section B, deals with problems of Correctional Institutions, and Section C, the activities of the Bureau of Institutional Management and the Bureau of Community Work.

Members of the staff of the Bureau of Institutional Management are specialists in the different fields of institutional administration. This Bureau renders services to all institutions supervised by the Department of Welfare. Advisory service is given to State-aided and State supervised institutions. The major responsibility is in the supervision of the operating functions of the State-owned Mental, Penal, and Medical and Surgical institutions.

During the war all the activities of this Bureau were intensified. Programs for the stimulation of increased production of food stuffs were inaugurated. New diets and feeding schedules were compiled and recommended in order to cope with the problems caused by the scarcity of food and rationing. Temporary measures were suggested for maintenance and repair activities where permanent improvements were impossible. The cooperation and response of all the institutions during this period was very commendable.

A large part of the responsibility of analyzing and planning improvements in the functional activities of the State-owned and operated institutions is carried on by this Bureau. Tables and statistics concerning the specific activities supervised by this Bureau will be found in this bulletin.

The Bureau of Community Work is responsible for certain important preventive activities of the Department of Welfare. The philosophy of the preventive program is to encourage services that will strengthen the home and aid all children, but in particular the neglected or dependent child so that

the amount of delinquency may be reduced and the possibility of mental illness may be lessened. In exercising the supervisory responsibility, the Bureau exercises every effort to encourage the improvement of standards for the care of the young, aged, ill, and visually handicapped citizens of our Commonwealth in or by agencies and institutions maintained for their care.

The administration of laws effecting the solicitation of funds for charitable or benevolent purposes by organizations and also the incorporation of non-profit, charitable, and eleemosynary institutions and agencies are the responsibility of the Bureau of Community Work.

The licensing and supervision of private hospitals, maternity services and convalescent homes, and the supervision of 172 State-aided hospitals is the responsibility of this Bureau.

In the 1945 General Assembly, an Act was passed empowering the Department of Welfare to collect statistics concerning juvenile delinquency. Plans have been made for fulfilling the provisions of this Act, but these cannot be put in effect until the necessary appropriation is available.

Detailed statements of the activities of the two Bureaus will be found in the separate reports which are a part of this bulletin.

This report is divided into two sections. The first section includes the tables, which were assembled in cooperation with the Bureau of Institutional Management. These include many of the administrative functions of the State-owned institutions. Such items as food consumption, unit prices of food, laundry activities, farm production, and utilities, appear in these tables. A separate group of tables depicts the different types of services rendered by the State-owned hospitals.

The section prepared in cooperation with the Bureau of Community Work includes facts concerning the number of children receiving care away from their own home. As a part of the services rendered to children are the activities of the Rural Child Welfare Unit, which operates under the agreement with the County Institution Districts of different counties. Included in this section of the report are the statistics of the Child Guidance Center. The analysis of the population of county homes and the institutions supervised by the Division of Family and Child Care are included in separate tables.

Cost analysis and tables giving the number of employees in the different institutions are found in the latter part of this bulletin.

The staff of the Division of Research and Statistics under the supervision of Mrs. Gertrude H. Thompson, prepared and compiled, in cooperation with the two Bureaus, the tables and statistics which appear in this report.

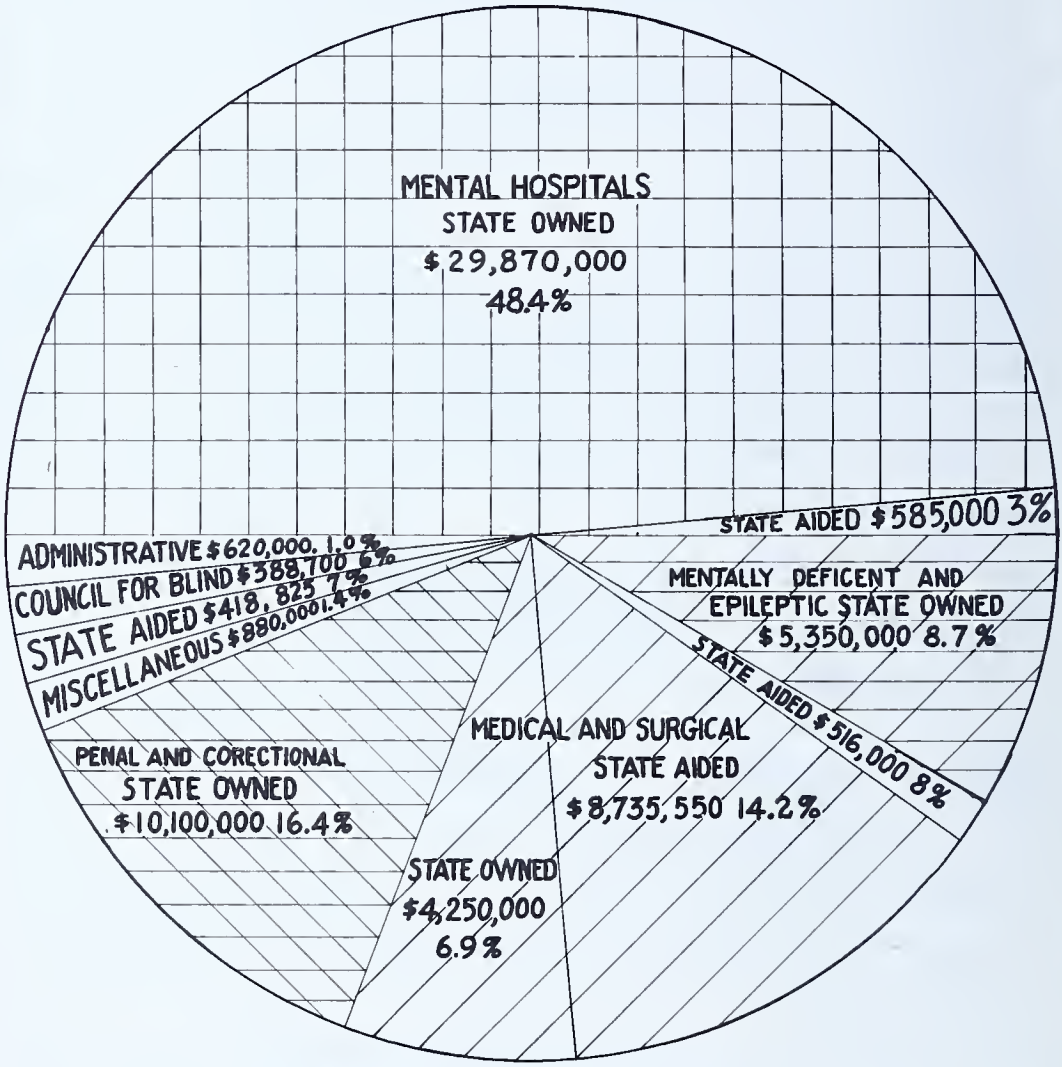
## $61,714,075



# WHERE THE WELFARE DOLLARS GO

## THE BUREAU OF INSTITUTIONAL MANAGEMENT

The Bureau of Institutional Management is responsible to the Commonwealth and thirty-eight State-Owned Institutions for developing and supervising a program providing food, clothing, light, water, heat, farm products and general maintenance. Standards for goals of performance are promoted. Key employees are called together for conferences on important problems. Monthly summaries of data reflecting efficiency of the food, laundry, hospital, farm and engineering service records are issued to institutions.

### Dietary

Tables I and II show the ration or the daily per capita food requirements which have been estimated for the different types of institutions for a period of one year. This ration has been based on the essentials of a low cost adequate diet. It is used as a yardstick in judging the adequacy of the institutional food consumption. It is also used as a guide in planning the production of the institutional farms and in the purchase of perishable foods to supplement such production, as well as in the purchase of staple foodstuffs.

The variations as to the performance of the different institutions is attributed to factors such as weather and soil conditions; availability of supplies; facilities for canning, storage and preparation and number of personnel as well as psychological and budgetary factors. Quality, variety and economy are stressed and every attempt is made to insure adequate food consumption and satisfaction for both patients and personnel.

The average food consumption figure for 1944-45 shows a slight increase over that of 1943-44. It is still somewhat below the amount set up in the basic ration. The decrease in consumption of such foods as meat,

butter, cheese, sugar and canned foods reflects the result of rationing and the inability to procure these foods despite adequate ration points. In some instances, inability to purchase more food is due to lack of budget. It is noted that food costs increased about 4¢ per person during the last two year period, since 1940-41 they increased nearly 9¢ per person.

Table III indicates the trend in prices of certain type foods for a period of five years. The figures given were obtained from the prices submitted from nineteen institutions, including mental hospitals, schools for mental defectives, and penal institutions. It in turn justifies the general increase in institutional food costs.

The processing of fruits and vegetables was emphasized and continued as in previous years where institutions had the necessary facilities. The 1944 pack was about 504,781 #10 cans or its equivalent, in addition to about 17,230 pounds of products dried, 23,639 pounds were frozen. In 1943 the approximate amount was 521,072 #10 cans, while in 1942 it was 339,979 #10 cans. Unfavorable growing conditions was the chief reason for the decrease in amount of food processed in 1944 as compared with 1943. One institution installed quick-freezing facilities instead of a cannery. This has proven very satisfactory.

Dietary departments have suffered the same personnel casualties as other institutional departments. A depletion of 50% of the regular staff was not unusual.

Farms

The operation of farms has long been accepted as sound practice in connection with mental and penal institutions. At such institutions it is desirable that sufficient acreage be controlled to somewhat isolate the institution from the community. The ownership of land provides opportunity

budgets.

Farms are operated in connection with 27 institutions under the Pennsylvania Department of Welfare. The acreage involved is in excess of 33000. Of this total, about 15,800 acres are under cultivation. Land not considered tillable is utilized as pastures or forests. A definite plan has been developed for the utilization of all land in line with best accepted management practices.

Herds of dairy cattle and swine as well as poultry flocks, are maintained at all institutions where such facilities have been provided. Beef cattle for institutional slaughter are fed in limited numbers at institutions having surplusses of roughage or pasture. This latter activity has been expanded during recent war years due to inability of institutions to secure meat through regular market channels.

All vegetables, livestock, fruit and field crop production is planned to meet institutional needs. Wholesome work opportunity for patients or inmates is an important factor.

Table VII indicates unit livestock production during the past fiscal year as compared to that in 1929. A crop index figure is also used to indicate efficiency in field crop production. This crop index shows a comparison of institutional yields with the 10 year averages for their respective counties.

Laundry

Table IV records by institution, average population, pounds soiled goods; employees---paid and others; washing costs and gross costs per pound of soiled goods. The population at institutions receiving laundry service, 54,916 including employees, is the highest recorded for many years, although it is less than 100 above that for 1944. The slightly increased

number is due to increased admission in the Mental Hospitals.

Total pounds of soiled goods, 46,653,606 pounds, is 233,313 pounds less than a year ago. That figure reflecte personnel difficulties as well as problems in procurement of textiles.

Working costs are approximately the same showing 1/10 of a mill more per pound while gross costs, which include salaries and minor repairs, are 7/10 of a mill higher or approximately 10%. Some rise in cost is to be expected due to difficulties in replacement of equipment and higher cost of repairs; also some increased cost of all supplies due to war conditions.

Patients and/or inmates employed in institutional laundries totaled 1,521, an increase of 41 above a comparable number a year ago. The work opportunities provided, not only contribute to the well being of patients and inmates, who otherwise might not have had any employment, but also tends to lower costs in laundry operation.

Laundry Test Bundle

Table V shows a comparison of the forty-first test bundle with the average of the first five test bundles, the latter run up to late in 1936. A marked improvement in efficiency in institutional laundry performance is evident. Figures given are averages for forty institutions. The improvement is evident in all three bases of appraisal: breaking strength loss, whiteness retention, and soil removal. Soil removal shows the highest percentage of improvement, approximately 60%, as compared with nine years ago when laboratory analysis was first initiated in connection with laundry operation.

Laboratory service and analysis are available through coordination with the Department of Textile Chemistry at the Pennsylvania State College.

Through that service, the major objectives of the institutional

laundries are achieved in a more efficient manner. These objectives include sanitation, sterilization, and an increased degree of comfort to patients and employees, and efficient operation at a cost below commercial laundry charges.

Engineering

The engineering activities cover the various utilities used in conjunction with the operation of the institutions and the maintenance problems that effect the continuity of each of the utilities together with the care of the physical property. Table IX covers the annual costs for the purchase of the basic maintenance materials and utilities. The purchase of coal is the largest single item. Coal cost for the year was 15% greater than for the previous year, the increased tonnage was approximately the same. More than half of the increased tonnage was consumed at Woodville where fuel was purchased due to discontinuation of mining. A considerable increase in consumption was shown at Norristown due to low quality of fuel procured.

Purchase of electricity represents approximately one-half the current actually used. The total KWH purchased was approximately 17% greater than in 1943-1944. A considerable portion of this increase appeared at Philadelphia.

Institutional Utilities Data

For the fiscal years ending May 31, 1944 and 1945, data is given relative to consumption of coal, purchase of electricity, gas, water and fuel oil.

| | | | |
|---|---|---|---|
| Coal | 1945 | 326,768 tons | $1,343,474.25 cost |
| | 1944 | 282,749 tons | 1,161,679.45 cost |
| Electricity | 1945 | 8,778,922 KWH | 140,082.28 cost |
| | 1944 | 7,334,963 KWH | 120,932.58 cost |

| | | | |
|---|---|---|---|
| Gas | 1945 | 107,959 M cu. ft. | 56,735.33 |
| | 1944 | 87,725 M cu. ft. | 50,741.20 |
| Water | 1945 | 1,549,375,M's Gals. | 101,986.26 |
| | 1944 | 1,142.405,M's Gals. | 72,677.36 |
| Fuel Oil | 1945 | 1,930,454 gals. | 97,172.75 |
| | 1944 | 2,724,860 gals. | 141,514.52 |

The increased quantities in 1945 over 1944 are largely accounted for by the Mayview State Hospital not being included in 1944 figures. Marked increases in purchase of electricity occurred at State Hospitals located at Allentown, Hollidaysburg, and Philadelphia. Coal consumed was higher in 1945 than in 1944 in certain instances because of poor quality of product received.

Hospital Service

Analysis of Hospital Service at State-Owned Medical and Surgical Hospitals is shown in the following tables:

-----Patients, Type of Service and Number
-----Laboratory Analysis and X-Ray Examination, Type and Number
-----Clinic, Type and Attendance

The total number of patients admitted, 33,796, compared with the data for 1944 reveals an increase of more than 600 in the number of admissions to these hospitals.

Table XI shows the amount of laboratory work done, with a total of 363,914 examinations, or 10.7 tests per patient admitted. This is a slight increase over the previous year when the tests performed were 9.4 per patient admitted. A total of 33,692 X-Ray examinations were reported this year, which is an increase of more than 2600 over last year's report.

The attendance at the hospital clinics, Table XII, has decreased considerably with a total of 44,640 visits, or 17,738 fewer than were re-

ported a year ago. This no doubt was due to higher wages being paid and increased employment, which permitted medical service through regular channels.

Nursing Education

As will be noted in Table XIII, the number of students who have completed the three-year course in nursing, conducted at four general hospitals and one mental hospital, has increased over the previous year. In compliance with the U.S. Cadet Nurse Corps program, the Ashland, Philipsburg, and Scranton State Hospitals Augmented their enrollment of students.

The number of students receiving psychiatric nursing affiliation has nearly doubled the past year. Because of greater realization by professional groups that psychiatric nursing should be included in the basic nursing course, the demand for this training made necessary the enrollment of larger affiliate groups in the five mental hospitals offering this program.

The Senior Cadet program in State Mental Hospitals maintained in seven mental institutions, has increasingly developed during the year. This program provided stimulation for hospital personnel and the Senior Cadets rendered invaluable service to the patients. In many instances, Senior Cadets were employed on the nursing staff at the end of the course.

As noted in the table, the Harrisburg State Hospital maintained its course for licensed attendants, though a relatively smaller number of students completed the course. This was due to the fact that qualified men were drafted into the military service, and with the many inducements offered in industry to both men and women, the number of women attendants were greatly reduced, with few taking advantage of this program.

## BUREAU OF COMMUNITY WORK

The major responsibility of the Bureau of Community Work is that of prevention. In exercising the supervisory responsibilities the emphasis is placed upon encouraging programs which will provide adequate care, and assist the individual in every way possible to become happy and constructive citizens. In the activities involving the supervision of institutions and agencies caring for the chronically ill and aged, the objective is to see that these patients have adequate care, and wherever possible, steps are taken to aid recovery.

Prior to January 1, 1945, there were two Divisions in the Bureau. They were the Division of Family and Child Welfare and the Division of Homes and Hospitals. Upon orders issued by the Secretary of Welfare, S.M.R. O'Hara, the Bureau was reorganized, and it now includes the Division of Research and Statistics and the State Council for the Blind.

The Division of Family and Child Welfare is responsible for the supervision of approximately 440 institutions or organizations dealing with children. They are classified as follows:

| | |
|---|---|
| Private Child Caring Agencies..... | 77 |
| Institutions for Dependent Children..... | 143 |
| Institutions for Delinquent Children..... | 23 |
| Day Nurseries..... | 31 |
| Public Child Caring Agencies..... (County Institution Districts excluding Allegheny County | 66 |
| Juvenile Courts..... | 67 |
| Detention Quarters..... | 24 |
| Maternity Homes..... | 11 |

Approximately 40,000 children are cared for by the different institutions and agencies of the State. The impact of the war was observed in the increasing number of problems in the fields of service

for children. The incident of juvenile delinquency, especially among girls, increased noticeably during the war period. The inability to secure personnel and materials had a definite effect upon institutional programs. The limited number of available physicians made it difficult to continue adequate immunization programs. During this period the Bureau exercised every effort to be of aid to the administrators in solving their many complex problems. Wherever possible encouragement was given so that every effort would be exerted in order to maintain standards in spite of the unusual conditions.

In addition to supervising children's activities, this Division supervises 62 County Homes and 16 State-aided Homes for the Aged. This responsibility not only involves visits but also the approval, for the Department of Welfare, of plans for major renovations or new construction. The issuing of licenses to Boarding Homes caring for children under the age of three years is conducted by this Division. The importation Act which cares for the placement of out-of-state children in the Commonwealth is also administered by this Division.

During the war a Child Care Bureau was created in the State Council for Defense for the purpose of helping communities in the establishment of Day Care Centers. These Centers were created to care for the children of mothers, the majority of whom were employed in war production activities. These Centers were subsidized by Federal funds. In February, 1945, this responsibility was transferred to the Division of Family and Child Welfare.

The Rural Child Welfare Unit, which operates under cooperative agreement with the U.S. Children's Bureau, is a part of this Division. This Unit receives Federal appropriation and the purpose is to stimulate Child Welfare services in rural counties. As a part of its service the

Tri-County Child Guidance Center, located in Harrisburg, offers services to a number of counties in the central part of the state. In cooperation with the County Commissioners, who have the responsibility of directing the work of the County Institution Districts, 14 counties have established Child Welfare programs, and these are supervised under agreement by the Staff of the Rural Child Welfare Unit.

The statistics contained in this book reflect the increased interest and participation of the public officials and the citizens in the counties supervised by the Unit.

Division of Homes and Hospitals

The Division licenses and supervises four maternity hospitals, and an average of 230 Private Nursing Homes and Hospitals. In addition, a minimum of one visit each year is made to the 172 State-aided hospitals. There are also 53 hospitals operating under a Charter of the First Class which maintain maternity departments and these are supervised by this Division.

The increased problem of caring for the aged, especially those requiring nursing care, has been noted. The pressure has resulted from the fact that people are living longer, and that many families do not have housing facilities. The demand upon general hospitals has been so great that they are unable to give extended care to the chronically ill.

During the war period the usual problems were faced by hospitals throughout the state. This Division attempted to strengthen such things as record keeping, and other administrative functions not affected by shortages caused by the war. The increased demand for hospital service is reflected in this report.

Division of Research and Statistics

This Division is responsible for collecting and compiling

reports involving all Bureaus of the Department of Welfare. These reports include information concerning patients admitted to hospitals for the mentally ill, mentally deficient, and epileptic owned and operated by the Commonwealth. Information on individuals committed to the State Penal and Correctional Institutions is also received and tabulated.

Three formal bulletins are issued each year. In addition to these bulletins, routine daily, weekly, and monthly reports are prepared on administrative problems. Upon request many special reports are compiled.

Plans are in process for the improvement of the statistics concerning children. These statistics will include both the record of juvenile delinquency and also additional facts concerning children receiving care.
